I really think you need to just leave xm radio alone. It is the next best thing since cable tv. I have drove truck near all my life and it is nice to be able to know what the weather is where I am going, or what the traffic is early in the mornings going into the larger cities. My wife and I have 4 xm radios in our cars and home, to which we pay a fee each month. But as a driver we think it is well worth the money for the information and entertainment that we get to hear. So we ask you to please don't mess with our xm radio.

Thank you

Allen Wright
